5.(a)	*Surveillance has increased manifold since the 9/11 terror attacks on the World Trade Centre in the U.S. This increase in surveillance today shapes the relationship between the state and the individual. The state keeps an eye on its citizens, thereby positing each and every citizen as a potential wrong-doer. For instance, the proliferation of the CCTV cameras in streets, restaurants and in every imaginable public space. In fact, the camera need not even be functional in order to make the citizens behave themselves – its mere presence is enough to scare the citizens into submission. Such is the power of the mere potential of surveillance. Surveillance studies have shown that these techniques might not be too effective at all times, citizens might feign decent behaviour in order to avoid themselves from getting into a tussle with the law of the land. But it does not assure the state of the reformation in the attitude of the citizens. It is a mere eye-wash. It works only when the citizen truly desires to transform his or her attitude and adopt decency in all walks of life. The act of constant surveillance makes the state a voyeur –	CO4	3	BH210

	a person who derives pleasure from watching events unfold in a secretive manner. A recent case in point would be the raid on a hotel in the so-called cosmopolitan city of Mumbai where young couples were consensually residing. The state has today entered the bed-room. And this is an unhealthy proposition! Examine the text and answer the following questions: Q 1 What is the effect of the state's surveillance on the individual? Q 2 Does the CCTV need to be functional all the time? Q 3 Why is surveillance not effective always? Q 4 When is surveillance really effective?			
5.(b)	*As we look forward to the bright future awaiting us, we must determine where our strengths lie. Much of the conventional analyses of India's position in the world relies on the all-too familiar indices of GDP, impressive economic growth rates and our military prowess. But if there is one attribute of independent India to which we have not yet paid much attention is its 'soft power' The notion of soft-power is relatively new. It was coined by Harvard's Joseph Nye to describe the extraordinary strengths of the United States that went well beyond the American military and economic dominance. The fact is that the U.S. is home to Boeing, Microsoft, Apple, Intel, MTV, Hollywood, Disneyland, Kodak and so on - in short, most of the major products that dominate daily life around the globe. This has ensured the maximisation of the soft power of the US - that is, <u>the ability to attract and persuade others to adopt America's agenda, rather than relying purely on the coercive hard power of military force.</u> Thus, this soft power is undoubtedly more important than the hard power. <u>For India, it means paying attention to the aspects and products of our society that the world would find attractive</u> - not in order to directly persuade others to support us but to enhance our country's standing in their eyes. Bollywood is doing a great deal in this direction by bringing entertainment home to people (the diaspora) in the U.S. and elsewhere. Indian classical music and dance have the same effect. So does the work of our fashion designers, chefs and cricketers. Examine the text and mark true or false: Q 1 Soft power has been in use in international discourse since a long time T Q 2 Soft power will ensure direct support to India F Q 3 Soft power is less effective in making the world accept America's agenda F Q 4 Bollywood is enhancing India's soft power T	CO4	3
